

# DENTAL RELEASE FORM

## Lake City Animal Clinic, Inc.

Client Name \_\_\_\_\_ Date \_\_\_\_\_

Pet Name \_\_\_\_\_ Contact Phone # \_\_\_\_\_

While your pet is here today he/she will be undergoing a prophylactic treatment to clean teeth and to improve gum tissue.

By their very nature, pets' mouths are difficult to thoroughly examine while awake. For this reason, while under general anesthesia he/she will be given an extensive oral examination. More severe disease than was initially determined may be found. Abscesses, loosened teeth, decay or periodontal disease may necessitate the extraction of teeth. Estimate for tooth extraction ranges from \$16.25 - \$225.30 per tooth depending on the length of time and difficulty of each extraction.

At this time the doctor will determine the most medically sound course of treatment and contact you at the number provided. As your pet is under anesthesia, optimum use of time MUST be made. If we are unable to reach you the doctor will proceed with the needed treatment(s). Please rest assured that we will do no more than is medically necessary for the health and well being of your pet.

### AUTHORIZATION

Understanding the above procedures, I hereby authorize the doctors at Lake City Animal Clinic, Inc. to proceed with anesthesia, dental examination, cleaning, polishing and extraction(s) as found medically necessary.

We offer OraVet Plaque Prevention Gel application as the last step in your pet's dental cleaning. OraVet Gel creates an invisible barrier that prevents plaque and tartar-forming bacteria attaching to teeth. Weekly at-home applications maintain the barrier established at the time of dental cleaning. Initial application is \$29.62 and a 2 month supply of at-home applications is \$33.02.

Yes, please apply OraVet Gel and dispense at-home applications \_\_\_\_\_

No, please do not apply OraVet Gel \_\_\_\_\_
